## **NOISE EMISSION FRONIUS ECO**

### **Fronius International GmbH**

confirms the following acoustic parameters:

	<b>Sound power</b>	<b>Sound pressure</b>
<b>Fronius Eco 25.0-3-S</b>	72,5 dB(A) (ref. 1pW)	60,3 dB(A) (ref. 20µPa)
<b>Fronius Eco 27.0-3-S</b>	72,5 dB(A) (ref. 1pW)	60,3 dB(A) (ref. 20µPa)

Acoustic measurements can deliver several parameters. The typically used one are sound power level and sound pressure level.

Sound power is the sum of noise emitted over the whole surface of the device.

Sound pressure is typically measured in 1m distance in front of the housing and represents the noise exposure at this position in a certain ambient.
